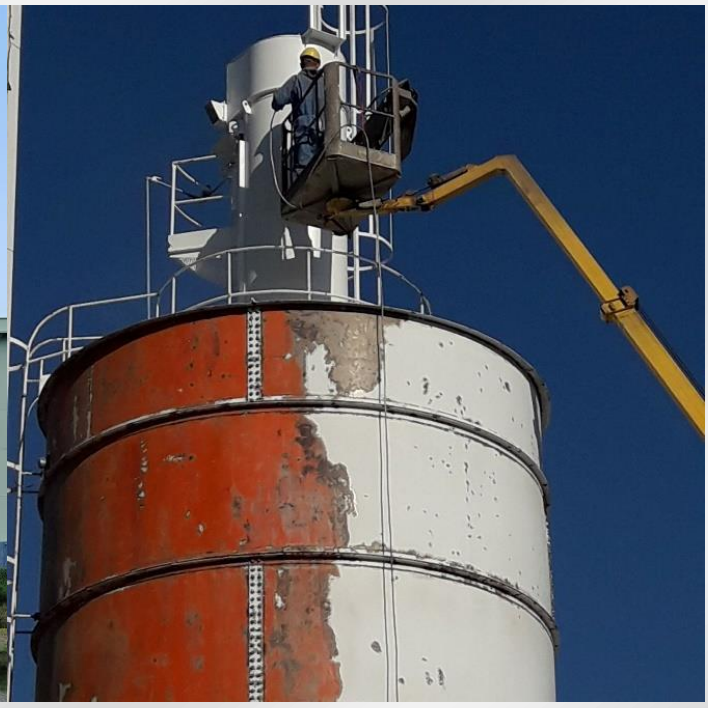
RD COATINGS

Experts in Water-based Protective Coatings

SIMPLE SURFACE PREPARATION, NO NEED FOR BLASTING!

No blasting is required to achieve the proper surface profile for our coatings to function effectively. This results in significant cost savings, a safer working environment, and a more environmentally friendly approach.



SUPER RESISTANCE AGAINST CORROSION

RD Coatings' water-based anticorrosion systems are exceptional. Our single-package coatings have undergone extensive testing across various industries and in the most challenging conditions. They are accredited for C5 environments according to ISO 12944.

SAFER FOR OUR PLANET AND FOR THE CONTRACTORS

With very low VOC levels and no solvents, RD Coatings anticorrosion systems are better for our planet and much safer to use. Even cleaning the tools and equipment doesn't require anything else than water!

VERY HIGH PRODUCTIVITY

Our flagship products RD-Elastometal and RD-Monoguard combine extraordinary properties:

- C5 High accreditated systems
- Single package -> No mixing error, no pot-life, no wastage
- Fast drying -> faster work, lower downtime
- Surface tolerant and UV resistant, excellent thermal and solar reflection
